EXPERIENCE

Developed front-end user interfaces for several web applications using html,css,javascript.

Utilizing React framework to create interactive, responsive and user-friendly web designs.

Using figma designs to ensure web applications met customer requirements.

EDUCATION

Network Science

Informatics engineering, Lattakia, Syria

2025

Bachelor's degree

- Developed and maintained user-facing features for 5+ websites and applications using React JS, HTML, CSS, and JavaScript.
- Introduced the latest industry trends and technologies, ensuring the applications are modern and efficient.
- I accomplished portfolios for dentist and agricultural engineer to help them showing their latest jobs in organized and efficient way.
- I have done a great to-do list App that helps to arrange and schedule your daily tasks.
- To show my talents even more, I created a dashboard App for presenting graphs and showing some specific details about it.
- Most of the apps above were done by using React js and Vite tool to manage all the components also tailwind for more flexibility.
